

Software Engineer

New Orleans LA

Federated Sample is a market research technology firm based in New Orleans that focuses on bringing efficiency and automation to online sampling. By using our technology infrastructure, our clients gain global access to respondents while maintaining control and quality. Visit www.federatedsample.com for more information.

Federated Sample is looking for a Software Engineer to join our global product development team. Our clients use our flagship products, Fulcrum and Samplicio.us, to manage and execute complex, large-scale online sampling projects (surveys). Our development centers are located in New Orleans, Singapore, and Manila, Philippines.

The Software Engineer will be part of our development team in New Orleans and work closely with development team peers, Product Management team, and business and other support teams.

Requirements/Experience

- Masters or Bachelors degree in Computer Science
- Five years of hands-on software development experience in C#, C++, or Java
- Experience with .NET framework preferred
- Strong Object Oriented Programming skills
- Strong competencies in data structures, algorithms, and software design
- Experience with high volume and high performance web applications
- Strong SQL and Database skills
- Working knowledge of JavaScript, JSON, XML, and other associated technologies
- Strong debugging skills and ability to rapidly debug and solve problems in unfamiliar areas
- Experience in working in an Agile environment, with rapidly changing requirements and tight deadlines
- Strong verbal and written communication skills

Responsibilities

- Develop software features as described in the functional specifications documents. Collaborate with Product Managers and business stakeholders when needed to refine and modify requirements
- Work with the technical lead and software architect in following the firm's established design paradigms and design patterns
- Demonstrate strong unit testing and integration testing practices. Collaborate effectively with the software development team in code and feature integration aspects
- Aggressively resolve issues during the QA phase of the software release cycle
- Document code clearly and participate in code reviews
- Actively assist in support tickets and emergency bug fixes and rollouts
- Support the business teams and product managers in data extracts and data analysis
- Perform as a true Agile team member and exhibit competencies in all layers of the application stack. Demonstrate proficiency in developing software for user interface, business logic, data modeling and systems and component integration

Federated Sample is an Equal Opportunity Employer.
We thank all applicants; however only those short-listed for an interview will be contacted.
